

Senior Exploitation Engineer – Light Oil Business Unit

Reporting to the Exploitation Manager, Light Oil Business Unit, you will work as part of an active, multi-disciplinary team supporting new growth and existing production in the Viking play. You will assist with budget preparation, long-term planning, A&D evaluations and the annual review of corporate reserves.

Responsibilities:

- Monitor and evaluate reservoir performance to optimize production and recovery (e.g. Well testing, decline analysis, reservoir simulation, voidage & recovery factor analysis)
- Development of long-range asset development plans including project scheduling, type well analysis & production forecasts, reserve management and capital plans
- Develop production, recoverable reserves, and economics forecasts for internal budgets and report against these plans through the budget year
- Evaluate acquisition and divestiture opportunities, land strategies and joint ventures
- Ensure corporate compliance with regulatory bodies in areas relating to reservoir depletion and recovery schemes
- Assist with the company's reserve bookings and liaison with independent engineering audit firm(s)
- Evaluate secondary and EOR potential in existing pools

Qualifications:

- Engineering degree and membership in APEGGA
- Minimum 10+ years' experience, ideally including production and/or operational roles
- Waterflood experience a definite asset
- Strong English written and oral communication skills
- Works independently and as part of a multi-disciplinary team
- Ability to manage time and produce results under tight deadlines
- Proficient in the use of Value Navigator, geoSCOUT, Microsoft Office, and PVR
- Strong analytic skills with attention to detail
